

The University of Georgia

Campus Transport of Biohazardous Material

Office of Biosafety
University of Georgia

Before initiation of intra-campus transport, contact the Office of Biosafety at 2-7265 to obtain permission and verify process. Appropriate packaging and spill materials should an accidental release occur should be prepared and readily available prior to transport initiation. As required, utilize the Shipper's Declaration document and ensure that personnel have appropriate training (DOT hazardous materials training) and written plans prior to movement of a biohazardous agent.
