

Sanctions Implications for Online Courses

The provision of online course(s) to an individual physically located within a country subject to comprehensive sanctions administered by the U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) constitutes an export of a regulated service. Authorization for the provision of the regulated service must be granted via either by a general or specific license. In addition to the provision of services for offering the course, the export of items other than general software utilized to host the course would require review. The export of any commodities and items related to the course should be reviewed to determine any applicable licensing requirements.

Below is a detailed review of the related citations for each country.

Country	Citation	Course Level/Description	Allowable/Unallowable	Notes
Cuba
